# NOTES FOR CONTRIBUTORS

The *JRSM* is a forum for debate, education, and entertainment for clinicians interested in UK medicine and relevant international developments and research. The aim of publication in this journal is to influence clinical practice and policy making across the whole range of medicine.

The journal's prime responsibility is to readers. Authors should remember that the *JRSM* has an international and multispecialty readership that includes primary care and public health professionals.

The full text of each issue is available online at <http://www.jrsm.org> and all research papers are available free at publication.

If your article arises from a meeting of one of the Society's Sections please indicate on the title page the name of the Section and the date of the meeting.

The journal is a benefit of membership of the Royal Society of Medicine but it has full editorial independence.

All contributions should be submitted electronically via the *JRSM*'s online manuscript submission site (<http://mc.manuscriptcentral.com/jrsm>).

All other enquiries should be sent to:

Dr Kamran Abbasi

Editor, *JRSM*

Email: [kamran.abbasi@rsm.ac.uk](mailto:kamran.abbasi@rsm.ac.uk)

Tel: +44 (0)789 431 5264

Prepare your paper according to the 'Vancouver Style' (Uniform Requirements for Manuscripts Submitted to Biomedical Journals: *N Engl J Med* 1997;336:309-15). We do not follow this exactly. Take particular note of the passages on redundant publication, and ethics. Inform us about any overlap with other material in print or in press. You should also supply written permission to reproduce material from other publications, and provide full details of ethical approval.

The covering letter is important. To help editors in their preliminary evaluation, please indicate why you think the paper suitable for the *JRSM*. If your paper should be considered for fast-track publication, please explain why.

Please structure your discussion according to this editorial: 'The case for structuring the discussion of scientific papers,' Docherty and Smith, *BMJ* 1999;318:1224-1255 (see <http://bmj.bmjournals.com/cgi/content/full/318/7193/1224>).

Declare any financial or other competing interests that might be perceived (by anyone) as a source of bias for any of the authors; provide full details of funding and sponsorship of the study; and written consent to publication for a case report.

Please nominate an author as a guarantor for the work. The guarantor accepts full responsibility for the work and/or the conduct of the study, had access to the data, and controlled the decision to publish (see <http://bmj.com/cgi/content/full/323/7313/588>).

Finally, indicate who is the corresponding author and how he or she can be contacted.

The *JRSM* supports open access to research articles, and also uses an open peer review process as explained in 'JRSM introduces open

peer review,' Abbasi, *J R Soc Med* 206;99:379 (see <http://www.jrsm.org/cgi/content/full/99/8/379>).

## GUIDELINES ON WORD AND REFERENCE LIMITS

Essay: 2000 words, 20 references

Series: For discussion with editor

Review: 3000 words, 30 references

Research: 3000 words, 30 references

Grand Round: 700 words, 7 references

Media: For discussion with editor

Podium: 1000 words, 3 references

## EDITORIAL RESPONSES

We acknowledge receipt of contributions submitted through <http://mc.manuscriptcentral.com/jrsm>. After a preliminary triage to eliminate submissions that are unsuitable for the *JRSM*, the remaining science-based articles, either original or review, are sent for open peer review. Some material is published without external review.

The *JRSM* welcomes appeals against decisions, although the editor may decide that a decision is final and disallow further appeals.

## PROOFS AND OFFPRINTS

For most contributions, PDF proofs will be sent by email to the corresponding author before publication. Occasionally, there may not be time. The editor's decision is final.

When an article is published, a PDF of the final version is emailed to the corresponding author. An order form for additional offprints will have been sent with the proofs.
